

The benefits of Dentalplus+

Dental hygiene for an annual flat fee – keep your smile shining brightly.

Why you benefit from our Dentalplus+ program

1. Dental hygiene sessions as often as your dental hygienist recommends for an annual fee.
2. 10 years full warranty* on our implants, ceramic fillings, veneers and dentures.
3. And most of all: long lasting dental health and wellbeing. Less procedures and a beautiful smile displaying breathtaking teeth for a life time.

*as long as you participate in the **Dentalplus+** program.

We are looking forward to meeting you!

To make an appointment, just call us or visit us online. It's free.

Dentalplus+ Program
For longlasting dental health

Care on a regular basis with Dentalplus+

Dental hygiene sessions – as often as your dental hygienist recommends – and other ways to improve your dental health.

DR. HAGER | Zahnärzte

Dear patients,

for more than 35 years and already in the second generation, we have been helping our patients get beautiful and healthy teeth, thanks to state-of-the-art treatment methods. Many patients who have received treatment want to be able to maintain their health in the future – lucky for them we are able to help them get a plus – a **plus** in terms of dental quality. Dentalplus+ offers our patients that professional dental care (dental hygiene) they can't live without.

For an annual flat fee you receive thorough and in-depth dental hygiene sessions – as often as your personal dental hygienist recommends. There's even more: As long as you participate in the **Dentalplus+** program we give you a **10-year warranty** on dentures we provided you with.

It is especially important to maintain dental health following difficult procedures. Many years of experience have shown us that professional care is vital. As a result our patients enjoy beautiful and healthy teeth, shining brightly for a life time.

Your, *Familie Hager*

Family Hager and Dr. Hager Team

Dental hygiene with Dentalplus+

Strong and beautiful teeth – putting a professional plus in caring

Professional tooth cleaning

Beautiful and shiny teeth have always been associated with health, youthfulness and attractiveness. Just think of a smile displaying strong and beautiful teeth. It shows confidence and makes for that extra neat look. Unfortunately, despite proper tooth care at home, there remains a risk of dental diseases. This is due to the tricky natural shape of a tooth. It is difficult to clean areas besides the visible ones, because neighbouring teeth simply block the way.

In addition to home care (i.e. tooth brushing and flossing) we offer professional tooth cleaning as part of the dental hygiene sessions.

To allow for thorough and in-depth cleaning we make use of high-tech equipment. This goes beyond what you can achieve through daily home care.

On the following page you will find a detailed overview about the dental hygiene procedure.

Dentalplus+ means wellbeing

Healthy teeth – for a life time.
Proper care is what it's all about.

The dental hygiene procedure:

1. Check up

We start by carefully examining your teeth.

2. Scraping

Dental calculus is scraped off of the teeth, from the gaps and the gingival pockets.

3. Removing plaque

Plaque is removed from your teeth using precise equipment.

4. Removing stains

Removing unpleasant stains (from coffee, nicotine etc.) through state-of-the-art AIRFLOW powder blasting technology.

5. Polishing

Smoothing your teeth through gentle polishing (prevents bacteria reproduction on rough surfaces and in crevices).

6. Fluoridation

Fluoridating your polished teeth with a special coating that protects the enamel against mouth bacteria and acids.

7. Proper dental care

We will give you a quick and easy tutorial about proper home care using different kinds of utensils (i.e. tooth brush, interdental brushes, floss and tongue cleaners).

Through professional dental hygiene you can actively protect yourself against gum infection, parodontitis and caries.
