# DR. HAGER | Zahnärzte

## DR. HAGER | Zahnärzte

„Competence and human understanding –  
everything in one place.“

## Welcome!

As a team, we offer the full range of dental services. Competent, with a human touch – and everything in one place.

## Dear patients,

Whether you want to finally have beautiful, bright teeth, or you want to chew and bite properly again, or just want healthy teeth and healthy gums – we can help you. In our hands, you can feel safe and receive meaningful, quick, and lasting treatment. We have been offering safety and quality to our patients for 39 years, over two generations.

The various therapy options available to you will be discussed in depth during a personal consultation before treatment, as well as any questions or concerns you may have. We take plenty of time for this step, because we want you to benefit as much as possible from our treatment. **Consultations are always non-binding on your side.**

Yours sincerely, *Your Family Dr. Hager*

## The team at DR. HAGER.

The team at DR. HAGER has now been successfully working together with joy and enthusiasm for 39 years, spanning two generations.

We care about sustainability, patient satisfaction and health, as well as friendly treatment with a human touch. DR. HAGER | Dentists can be found at one location in Constance and at one location in Bietingen, near Schaffhausen.

## Great prices with the high quality standards

All DR. HAGER dentists work together as a team based on the latest findings in modern dentistry. For example, our practices also offer specialized treatments, such as the fitting of dental implants by specialists.

Prosthodontics such as crowns, bridges, and prostheses are manufactured in our in-house laboratory. This allows us to achieve smooth and high-quality treatment processes while keeping costs low. The treatment costs quoted during consultations are always fixed prices and are never exceeded.

## Professional treatment.

Thanks to modern procedures, we can safely and successfully treat patients who come to us with difficult and complex cases.

As a team, we offer almost the entire spectrum of professional dental services under one roof, thanks to the different specializations of our dentists. For you, this means you only need one trusted partner for your entire treatment – all in one place.

Our extensive experience in full restoration enables us to provide comprehensive and sustainable care, especially for patients with severely compromised oral health.

Even to patients who have lost all of their teeth, we can still offer excellent quality of life, for example by inserting dental implants that are **firmly anchored into the bone**. Today, this procedure is still possible even with severely damaged jawbones:

- ✓ Use of modern, minimally invasive surgical procedures
- ✓ Low-radiation digital tomography (ConeBeam-CT, DVT) performed in-house with 3D jaw measurement
- ✓ In-house dental laboratory directly connected to the practice
